Amazon Web Services

Amazon Web Services, is a cloud computing service created by Amazon. It is a collection of remote computing services (web services) that together make up a cloud computing platform, offered over the Internet.

Overview of AWS

- Started in 2006

- Invented huge in Datacenters across the globe

- AWS is located in 33 geographical 'Regions' and 105 availability zones.

- Each Region is wholly contained within a single country

Regions Map:

AWS Trail Subscription

- **12-Months Free**: These free tier offers are only available to new AWS customers, and are available for 12 months following your AWS sign-up date. When your 12 months free usage term expires or if your application use exceeds the tiers, you simply pay standard, pay-as-you-go service rates (see each service page for full pricing details). Restrictions apply; see offer terms for more details.

- **Always Free**: These free tier offers do not automatically expire at the end of your 12 months AWS Free Tier term, but are available to both existing and new AWS customers indefinitely.

- **Trials**: These free tier offers are short term trial offers that start from the time of first usage begins. Once the trial period expires you simply pay standard, pay-as-you-go service rates (see each service page for full pricing details).
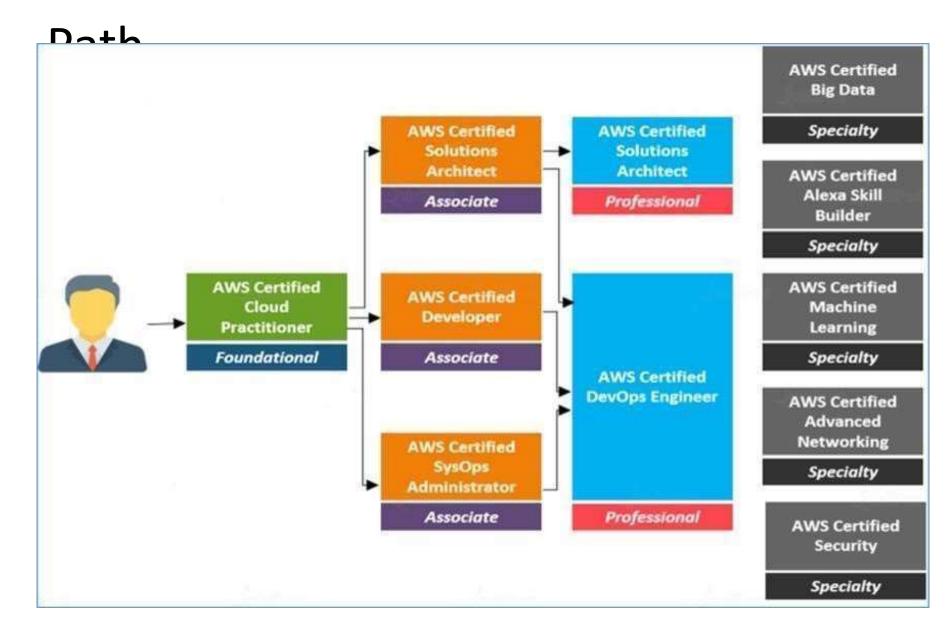

- **Free Tier details**: [Click Here](#)

List of Services

- EC2 (Elastic ComputeCloud)
- S3 (Simple Storage Service)
- IAM (Identity & Access Management)
- Elastic Load Balancer
- Auto Scaling
